

# SEPTIC WASTE HAULER GUIDELINES

## SECTION 1: DISCHARGE REQUIREMENTS

The discharge of all hauled wastes must be performed at the designated area: Kimball Waste Treatment Plant, 4350 East Front Street. Accessing the city sewer system at any other location is prohibited. Discharges may be performed by **appointment only** from 6:30 AM to 3:00 PM Monday – Friday or Saturday/Sunday/Holidays from 7:30 AM to 8:30 AM. Check-in at the plant office will be required prior to dumping. **After hours dumping is subject to a minimum of two (2) overtime hours plus dump fees.**

Hauled wastes are subject to sampling by the city. The hauler may be required to suspend the discharging of wastes until the analysis is complete. The city reserves the right to refuse permission to dump any load.

The permit is issued contingent on maintenance of a Nebraska Haulers License. If the state license is allowed to lapse or is revoked by the state, this city permit will also expire or otherwise be revoked.

Permit holders must maintain a current account status with the city. Any user not paying their city account by the due date in the account bill will not be allowed further use of the dump station until the account is paid in full.

All wastes shall be declared on the hauled wastewater discharge manifest form provided and shall not contain a prohibited discharge. Each user must present a completed discharge manifest form, accurately listing each source of the load, prior to disposal.

## SECTION 2: SPECIFIC LIMITATIONS

The following types of waste will not be accepted for disposal at the City of Kimball Wastewater Treatment Plant:

- Industrial or business wastes, including wastes from any sand/oil separators, grease traps, hot tanks, dip or batch tanks, or any other tank, pit, pond, or container used to hold wastes or products used in a business or related purpose, or wastes other than domestic residential use.
- Any waste that may cause pass-through of pollutants or interfere with the wastewater treatment plant operations, or that violates Federal, State, or local restrictions, shall not be discharged to the Kimball Wastewater Treatment System.
- The Permittee is prohibited from discharging hauled wastewater containing the following materials:
  - Fats, wax, grease, or oils of petroleum origin, whether emulsified or not;
  - Any liquids, solids, or gases that can create fire, explosion, or health hazard;
  - Any substances capable of causing obstructions or interferences with proper operation of the sewer system;
  - Any pollutant that will cause a pass-through of pollutants to occur, or an interference with the city wastewater treatment facility's operations or sludge use and/or disposal practices;
  - Any wastes, sludge screenings, or other residues from business or industrial wastes, or the pretreatment of business or industrial wastes;
  - Detergents, surface active agents, or other substances that may cause excessive foaming in the municipal wastewater system;
  - Ammonia, ammonia salts, or other chelating agents that will produce metallic complexes that interfere with the municipal wastewater systems;
  - Material considered a hazardous waste under the Resource Conservation and Recovery Act (R.C.R.A.), or materials that are toxic, hazardous, radioactive, or infectious medical wastes.

## SECTION 3: MONITORING AND RECORDS

All wastes **must** be accompanied by a completed hauled discharge manifest form. All information regarding the wastes origin of each waste generator will be included. The hauler shall sign the form indicating that they have accepted no wastes other than those listed. Failure to accurately record every load, falsification of data, or failure to transmit the form to the city prior to discharge may result in revocation of this permit or other consequences.

The permittee shall retain records of all monitoring information, waste manifest forms, copies of any reports required, and records of all data pertaining to hauled loads for a period of at least three years. This period may be extended by request of the city at anytime.

## SECTION 4: GENERAL CONDITIONS

### Severability

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected.

### Duty to Comply

The permittee must comply with all conditions of this permit. Failure to comply with the requirements of this permit may be grounds for administrative action or enforcement proceedings including civil or criminal penalties, injunctive relief, and summary abatements.

### Duty to Mitigate

The permittee shall take all reasonable steps to minimize or correct any adverse impact to the public treatment plant or the environment resulting from noncompliance with this permit, including such accelerated or additional monitoring as necessary to determine the nature and impact of the noncomplying discharge.

### Permit Modification

This permit may be modified for good causes including, but not limited to, the following:

- To incorporate any new or revised Federal, State, or local pretreatment standard or requirement
- To incorporate any equipment modifications to existing vehicles or addition of new vehicles to fleet. All changes must be approved by the city prior to use of any new or modified equipment.
- Material or substantial alterations or additions to the discharger's operation processes, discharge volume, or character that were not considered in drafting the effective permit.
- A change in any condition in either the industrial user or the Publicly Owned Treatment Works (POTW) that requires either a temporary or permanent reduction or elimination of the authorized discharge.
- Information indicating that the permitted discharge poses a threat to the city's collection and treatment systems, POTW personnel, or the receiving waters.
- Violation of any terms or conditions of the permit.
- Misrepresentation or failure to fully disclose all facts in the permit application or in any required reporting.
- To correct typographical or other errors in the permit.
- Upon request of the permittee, provided such request does not create a violation of any applicable requirements, standards, laws, or rules and regulations.
- The filing of a request by the permittee for a permit modification, revocation and reissuance, termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.

### Permit Termination

- This permit may be terminated for any of the following reasons:
- Failing to submit a completed discharge manifest form for each load brought in for disposal.
- Supplying false information on discharge manifest form regarding content and/or source of load, amount discharged, or vehicle identification.
- Refusing reasonable and/or timely access to the user's premises for the purpose of inspection, monitoring, or sampling.
